

Ralph Laude

ralphpaolo.laude@gmail.com • [LinkedIn](#) • portfolio.ralphlaude.com

Automation Engineer & Full Stack Specialist with 12+ years in technical operations, specialized in building AI-powered workflows, REST API integrations, and custom code (Python/JS) and low-code/no-code platforms (n8n, Zapier, Power Automate). Experienced in collaborating with development and technical teams to investigate issues, document resolutions, and improve support processes. Currently expanding into AI/LLM platform operations and automation workflows.

SKILLS

- **Technical Support & Operations:** Incident Management, Incident Triage, Troubleshooting, Escalation, SLA Management, Root Cause Analysis, ServiceNow, ITSM, Knowledge Management
- **APIs & Integration:** REST APIs, Node.js, Astro, OpenAPI, Swagger, Postman, MongoDB, API Testing, API Troubleshooting, Authentication, Authorization, Google Cloud Platform
- **Programming & Automation:** Python, JavaScript, Bash/Shell, Automation, Integration Workflows
- **Systems & Infrastructure:** Linux, DNS, Firewalls, VPN, Log Analysis, System Troubleshooting
- **DevOps & Cloud:** Git, GitLab, CI/CD, Deployment Processes, Containers, Docker
- **AI & LLM:** LLMs, Prompt Engineering, AI Automation, AI Workflows, AI Platform Operations
- **Documentation & Knowledge Management:** Technical Documentation, API Documentation, Runbooks, SOPs, Knowledge Bases, Troubleshooting Guides, Incident Reports

PROJECTS

Freelancer.com Projects Fetcher

- An n8n automation workflow that periodically retrieves Freelancer.com projects through API integration, processes project data using an LLM, generates structured summaries, filters relevant opportunities, and stores results in a MongoDB for downstream workflows.

Personal portfolio

- A personal portfolio built using Astro, Tailwind CSS, TypeScript, and integrations. Includes a landing page, blog and project posts collections, navigation animation, and mobile-friendly interface. Connected to Cloudflare for simple, automated deployments.

EXPERIENCE

Freelance Automation Specialist

January 2026 – Present

Designing and developing AI-powered automation workflows for streamlined processes using no-code implementations such as n8n, Zapier, and Power Automate.

Myridius | Technical Writer – EPG Developer Portal

May 2024 – December 2025

Supported API and developer-platform operations by validating REST API behavior and documentation using Postman and IntelliJ IDEA, collaborating with product and development teams in an Agile environment.

- Achieved 100% on-time publishing of release-related updates, including API specifications, release notes, and feature documentation.
- Managed GitLab repositories containing API reference and developer portal documentation, supporting version control and release activities.

Cognizant Technology Philippines, Inc. | Knowledge Manager for YouTube VET

September 2023 – May 2024

Managed and organized the YouTube Vendor Development knowledge base, collaborating with clients to create and update articles, resulting in improved efficiency and accuracy for VD agents.

- Completed audit of 1500 articles within target SLA, achieving a 99% average rating on internal quality audits by ensuring the correct usage of client- and customer-sensitive terms.
- Coordinated with clients and instructional designers to align process KB articles with training materials, enhancing the consistency and usability of documentation.

NICE CXone Philippines, Inc. | Technical Writing Specialist (Knowledge Management)

June 2021 – September 2023

Participated in incident management activities for Priority 1 incidents, providing real-time stakeholder communications and coordinating with technical teams during incident resolution. Created post-incident documentation capturing incident details, remediation activities, and resolution information for future troubleshooting and knowledge reuse.

- Achieved 100% on-time publishing of incident documentation articles.
- Maintained 300 NOC and Incident Management knowledge articles in ServiceNow, improving accessibility and usability of operational troubleshooting information.

Vertiv (Singapore) Philippines, Pte. Ltd. | Engineer II – Technical Documentation

October 2013 – June 2021

Developed and maintained technical documentation for Vertiv's UPS and HVAC products, including installation, repair, maintenance and upgrade procedures.

- Achieved 100% TAT for user feedback handling, which increased user engagement in feedback collection.
- Developed PowerShell and CLI scripts that automated code migration, reducing manual effort by 80%, improving operational efficiency and reducing repetitive manual activities.

EDUCATION

BS in Electronics Engineering | Manuel S. Enverga University Foundation – Lucena City

June 2008– April 2013

LICENCES AND CERTIFICATIONS

[ECE Licensure Exam Passer](#), December 2013 • [ECT Board Exam 4th Placer](#), October 2012
